

**IF THE GEARS DON'T WORK
I DON'T WORK**

NOT A PRETTY PICTURE

Never settle for close when you can have precision fit.

When it comes to the mechanical components you count on, close just doesn't cut it. Common sense says a poor fit and premature wear will eventually lead to failure. And no one has time for that. At Schafer, we specialize in custom, precision-fit products designed to keep equipment moving. Simply put, our service, quality and on-time delivery are second to none. Reliability is our trademark and it has helped us grow from Schafer Gear to Schafer Industries. These days, our expertise doesn't end with gears. Now we're leading the way in driveline, axle and brake applications as well. So whether you're in the automotive, truck, marine, off-road leisure, heavy equipment or aviation industry, look no further than Schafer. For more information visit us online.
